Contract NB-9184

PRIVACY WITHIN EO
ENGINEERING DIVISION

1. Certain of the specialized electronic circuits developed during the course of this contract have shown considerable promise of being usable in other operations. Consequently, the [redacted] 25X1 position was requested to furnish six (6) each of the 4 megacycle pre-amplifiers for our test and evaluation.

2. Inasmuch as the contract calls for fifty per cent electronic spares, these amplifiers were furnished to us at no additional cost. It is therefore requested that a letter be written to the contractor accepting these units as spare parts.

3. This memorandum constitutes acceptance of the six (6) pre-amplifiers originally furnished on a loan basis per [redacted] 25X1 engineering shipping papers No. SHE-713640 as partial delivery against spare parts, Item 2 of Contract NB-9184.
